As Technical Director of Hosting Ireland, I've been part of the Irish domain industry for over 20 years, starting as a small provider to becoming ICANN-accredited and now part of the global team.blue group. Along the way, I've gained hands-on experience in many challenges around domain registration and management - I've learned what works (and what doesn't) for registrars of all sizes.

As part of team.blue, I also bring insights from our group Accredited .ie Registrars: LetsHost, Register365, and Register.it. Over the past two years, I've had the privilege of standing in for the Register365 representative on the Policy Advisory Committee, so I'm already familiar with the challenges and opportunities the PAC addresses.

If elected, I'd focus on:

Improving Domain Products: I'm passionate about making the .ie namespace even better—simpler, more innovative, and more aligned with what registrars and their end-users need today.

Enhancing Security: Keeping .ie, a trusted and secure TLD, is a top priority. I'll work with the PAC to ensure policies protect the namespace against emerging threats and compliance requirements such as NIS2.

Streamlining Processes: I love finding ways to make things work better and more efficiently, whether that's through automation or improving workflows.

Why Vote for Me?

I've been part of this industry at every level—from start-up to global group—and understand the challenges registrars face. My experience as a stand-in representative for the committee means I can hit the ground running. With the combined knowledge of Hosting Ireland and the wider team.blue group, I shall bring ideas and a collaborative approach to represent registrars effectively.

Thank you for considering me for this role.
